Complete Streets: Plan, Policy & Performance
1:45 - 2:35 pm, Monday, April 25, 2016, Branson Convention Center

Complete streets are mostly known as a philosophy that considers all transportation modes equally in the planning and design of transportation networks. Complete streets are intended to improve transportation choice but can also improve community factors like public health, safety, energy conservation, air quality, land values, economic vitality, livable neighborhoods, civic space and human interaction, and access to jobs, goods and services. This multi-agency panel takes participants through the experiences and programs of locations within and outside the Missouri APWA area, and provides examples of how to instill complete streets in a plan, create adoptable policies that encourage long-term implementation, and understand factors to measure performance for complete street applications.

Speakers:
- Frank Miller, AICP, Missouri Department of Transportation, Southwest District
- David Hutchison, PE, City of Springfield, MO
- **Jim Townsend, AICP, Wilson & Company, Kansas City, MO**

Things You'll Learn

- How to plan a complete street network
- How to create a policy or policies that encourage incremental implementation of complete streets networks
- How to evaluate performance of complete streets

Meet Our Presenter

Jim Townsend, AICP, navigates complex and high-profile studies or programs, often first-time efforts for clients. His planning and operations background provides community direction and proven cost effective sustainable solutions. He has a B.S. degree in Urban and Regional Planning from California State Polytechnic University, and is certified by the American Institute of Certified Planners.
