It's All in the Cards: Innovation Examples from Utah's I-15, The Point Design-Build Project

8:00 am - 3:00 pm, Tuesday, October 4, 2016, Conference Center at Rio Salado, 2323 W. 14th St., Tempe, AZ

From Concrete Conveyors to Simplified Bridge Construction, and from Storm Sewer Laterals to LED High Mast Lighting, The Point Design-Build Project delivered innovative solutions throughout this impressive project.

The ACTI conference is an opportunity to hear nationally recognized speaker Shelley Row deliver two keynote speeches, with an interactive innovation showcase that features all types of creative solutions to transportation design and construction challenges. Check out the Wilson & Company showcase and learn about The Point in an interactive, innovative discussion.

Speakers:

- **Nicholas Thomas, PE, Wilson & Company, Colorado Springs, CO**
- Daniel Marum, Wilson & Company, Phoenix, AZ
- Amy Moran, Wilson & Company, Phoenix, AZ

Some of the Things You'll Learn

- How we removed more than 12,000 concrete trucks from I-15 by use of a conveyor system.
- How we protected in place over 60,000 LF of utilities that were planned to be relocated.
- How the use of cellular concrete pavement saved construction costs and reduced schedule impacts.
- How traffic was improved from pre-project conditions when traffic control was implemented.

Meet Our Presenter

Nicholas Thomas has focused the last 10 years of his career on Design-Build projects. Working with Wilson & Company since graduating from the University of Kansas with a B.S. in Civil Engineering in 2001, Nick has filled a variety of roles on Design-Build projects such as MOT Engineer, Roadway Design Lead, Project Engineer, and Design Manager across three states (Utah, Colorado, and Missouri).
